A. Description of the Proposed Local Improvement:

The local improvement plan proposed herein involves the provision of authority to construct and borrow funds for the completion of a new regional wastewater collection system to service the southern portion of the R.M. of St. Andrews (Phase 1). The wastewater will be conveyed via the Main Street Trunk Sewer in West St. Paul for treatment at the North End Water Pollution Control Centre in Winnipeg.

The project has been initiated by the Council of the R.M. of St. Andrews to provide a cost-effective means of treating wastewater while protecting the health of the community located within *the Manitoba Conservation Red River Corridor Designated Area* that was established in 2009 by Provincial Regulation. This Regulation prohibits the replacement or modification of existing septic fields and construction of new septic fields in the Corridor.

The Onsite Wastewater Management System Regulation of *The Environment Act* of Manitoba states in part as follows:

“Requirement to connect to new wastewater collection system

8.1(1) If a wastewater collection system is installed in an area not previously serviced by a wastewater collection system, an owner of land in that area must

- (a) connect his or her wastewater sources to the wastewater collection system; and
- (b) take any onsite wastewater management system or privy located on the land out of service and decommission it; before the earlier of
- (c) the passing of a period of five years from the day that the wastewater collection system was installed; or
- (d) the transfer or subdivision of the land.”

Phase 1 of the project is the construction of a regional wastewater forcemain from Riversprings Drive in West St. Paul to River Road in the R.M. of St. Andrews, a Lift Station and Odour Control System at River Road and low pressure lines throughout the Phase 1 service area.

Part 1 of the project is the construction of a regional wastewater forcemain from Riversprings Drive in West St. Paul to the south boundary of the R.M. of St. Andrews. The project includes the forcemain, a Lift Station at River Road and an Odour Control System. This portion of the project is referred to as the “GAP” and the costs of the forcemain only will be funded by Phase 1 and Phase 2 (north of Liss Road to the area south of Lower Fort Garry) equally. A map of the area included in Phase 1 and Phase 2 of the project is identified in Section I.

Part 2 of the project is the local servicing of all properties located in Phase 1 - south of Liss Road and east of CP Railway with a low-pressure sewer system. The properties will be required to connect within five (5) years once the wastewater system has been commissioned.

All work on private property and the connection cost to the City of Winnipeg (approximately \$2,300.00) will be paid directly by the property owner at the time of connection.

B. Identification of the local improvement district (LID #1):

The local improvement district will include all properties in the municipality other than property described in Section 21 of *The Municipal Assessment Act*.

C. Identification of the potential taxpayers:

The potential taxpayers will be the property owners of all taxable, grant-in-lieu and otherwise exempt properties in the municipality that are located in the area described as Phase 1 in the Rural Municipality of St. Andrews and are described in Schedule “C”.

D. Method and Rate for calculation of the proposed local improvement tax:

The method to be used for calculating the proposed local improvement tax will be based on an amount for each parcel of land on property that is real property, described in Schedule "C".

The rate will be:

Finance cost - \$618.39 per annum (based on one (1) lot) for the years 2018 to 2037

Or a

Lump-sum cost (pre-payment amount) of \$7,390.00 per one (1) lot due and payable on a date set by Council.
